

Course Exercise - Reference Files

Starting SEO as your Home

Week 1-4 - Lesson 4 - Instructor: Edward Norton

Your exercise for this week

1. Research 10 keywords for a home-based business niche.
2. Group them by search intent (informational / commercial).
3. Draft one page title and meta description for each group.
4. Check the estimated search volume for your top 3 keywords.
5. Bring your results to the next live session for review.

Tip: free tools like Google Trends and the search-bar autocomplete are enough for this exercise - no paid tools needed.
