

Course Exercise - Reference Files

Photography Basics: Shoot with Intention

Duration: 4 weeks - Instructor: Karim Fathy

Your exercise for this week

1. Shoot the same subject at three different apertures.
2. Practice the rule of thirds on five photos, then break it on one.
3. Take one photo during golden hour and one at noon; compare.
4. Pick your best 3 shots and say why they work.
5. Upload your selection before the next review session.

Complete the steps in order - each one builds on the previous. Bring your questions to the next session.
