

Course Exercise - Reference Files

UI/UX Foundations for Developers

Duration: 4 weeks - Instructor: Lina Haddad

Your exercise for this week

1. Collect 3 screens you consider well designed and say why.
2. Rebuild one of them as a quick wireframe (paper is fine).
3. Define a 4-step spacing scale and apply it to your wireframe.
4. Pick a primary color and derive hover and background tints.
5. Bring your wireframe to the next critique session.

Complete the steps in order - each one builds on the previous. Bring your questions to the next session.
